

Dear Dr. Lipuma,

The U.S. Army Educational Outreach Program (AEOP) and the eCYBERMISSION program would like to thank you for your work as a Virtual Judge during the 2019-2020 competition. With your help 7,834 scores and comments were delivered to students participating this year. The state winners were announced on the eCYBERMISSION website at www.ecybermission.com in April, and the national finalist and national winners will be posted in June.

Thanks to volunteers like you, the eCYBERMISSION Program is successful in its mission of demonstrating the importance of STEM to the future leaders of our nation. It is our hope that you will continue to encourage students toward a lifelong path of STEM exploration and future implementation of the values learned during eCYBERMISSION. We also hope that each student uses the eCYBERMISSION values of innovation, fun and creativity to pursue a lifelong passion for STEM education.

As the Deputy Assistant Secretary of the Army for Research and Technology, I've had the privilege of seeing projects earn well-deserved recognition for excellence in STEM. Today's younger generation will be tomorrow's leaders and through guidance and mentorships they will stand tall in their ability to ensure our nation's security, prosperity and overall success. Your dedication to STEM education gives me great hope for our nation's future. We encourage you to check out the other opportunities available to students as they advance in their education by visiting www.usaeop.com.

On behalf of the entire eCYBERMISSION Program and AEOP, thank you again for volunteering this year.

Sincerely,

Dr. Philip Perconti
Deputy Assistant Secretary of the Army
(Research and Technology)
